

**SCITUATE SCHOOL DEPARTMENT  
DEPARTMENT OF BUILDINGS AND GROUNDS**

# Memorandum

**To:** All Personnel  
**From:** Stephen Gormley  
**Date:** September  
**Re:** Annual Notification of Asbestos Management

The Asbestos Hazard Emergency Response Act (AHERA), signed into law on October 22, 1986, requires all local education agencies to identify asbestos containing materials in their buildings and take appropriate action to control the possible release of asbestos fibers. We are required to inform all personnel and occupants at least once a year about inspections, response actions, and post response activities including periodic re-inspection and surveillance activities, which are planned, or in progress.

In August 2012 a three-year AHERA inspection of all Scituate schools was performed. In August 2002, an inspection of or AHERA management plan and related records conducted by the RI Department of Health found Scituate to be in compliance with RI Rules and Regulations for asbestos control. Bi-annual re-inspections of all schools were conducted in February and August 2014. All our asbestos related information, including the results of any inspection and corresponding recommendations have been compiled in the asbestos management plan, which is available for review. A copy of the management plan is located in the Office of Buildings and Grounds and is available for inspection during normal hours.

Please contact me at 401 647-4120 x2121 if you would like to make arrangements to inspect the management plan.
